

TEXT INDEXING SYSTEM FOR WEB-BASED BUSINESS INTELLIGENCE

ABSTRACT OF THE DISCLOSURE

5 A text indexing system for collecting business  
intelligence about a client, as well as for identifying  
prospective customers of the client, for use in a lead  
generation system accessible by the client via the  
Internet. The text indexing system has various  
components, including a data acquisition process that  
10 extracts textual data from various Internet sources, a  
database for storing the extracted data, a text indexing  
server that executes keyword searches of the database,  
and an output repository. A web server provides client  
access to the repository, and to the indexing server.
